New Delhi 3 (India);

The 22nd May, 1950

S. P. JAIN,

For Registrar General

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 506, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisors of ind Square Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 29th April, 1950

Explanation of symbols used 1—B.—Births; B. R. —Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fevers; D.D.—Dysentary & Diarrhea; R.D.—Respiratory diseases; M.D.—Maternal deaths; D.R.—Death rate; I.D.—Infantile deaths (included in total deaths).

#### REMARKS

The figures of births and deaths shown in this statement for the week ending the 29th April, 1950 relate to 171 towns with an estimated population of 22,281 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 73% of the total number of towns representing 78% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 11,436 and 7,590 representing birth and death rates of 26.7 and 17.7 per thousand of population respectively.

(A) States (Parts A and C):—The data here relate to 151 towns with an estimated population of 19,701 thousands. Information about Assam, Bihar and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 75% of the total number of towns representing 80% of the total population is covered. The numbers of births and deaths recorded in these towns were 10,168 and 6,610 representing birth and death rates of

26.8 and 17.4 per thousand of population respectively. The table at the end gives the position by states.

The towns of Jhansi and Hardwar Union in Uttar Prudesh recorded high death rates of 131.2 and 73.2 per thousand of population respectively. In Jhansi the high death rate was largely due to deaths from fevers and smallpox and in Hardwar Union the high death rate was mainly due to deaths from fevers and respiratory diseases.

(B) States (Part B):—The data here relate to 20 towns with an estimated population of 2,580 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 63 of the total number of towns representing 69% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,268 and 980 representing birth and death rates of 25.6 and 19.0 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
